Please do not allow these lobbyists to destroy the great opportunity of satellite radio and all its information and listening pleasure. It is one great opportunity for Americans to listen to the news, weather, and great music as they travel the highways and listen also in their homes. In the areas of America which do not have readily radio information it is a necessity. Please allow the XM radios to continue to expand and include news and weather, especially for those areas of the United States that are not covered in any other way.
